

Climate Change Denial

Heads in the Sand

Haydn Washington and John Cook

Classification | Climate Change

May 2011

ISBN 9781849713368

Earthscan, 244pp, PB, 234 x 156mm

RRP AU\$34.95

Contents

- 1 Denial and the Nature of Science
 - 2 Climate science
 - 3 The Five Types of Climate Change Denial Arguments
 - 4 The History of Denial
 - 5 Do We Let Denial Prosper?
 - 6 Rolling Back Denial - the Big Picture
 - 7 Rolling Back Denial - the Technological Solutions
- Summary and Conclusion

This book shows how we can break through denial, accept reality, and thus solve the climate crisis. The authors examine the nature of climate change denial, its history, how we let denial prosper, and how we can roll back denial. It summarises the climate science and explains uncertainty and probability. It also explains the social science behind denial. It contains a detailed examination of the principal climate change denial arguments, from attacks on the integrity of scientists, to impossible expectations of proof and certainty to the cherry picking of data.

Climate change can be solved - but only when we cease to deny that it exists. This book will engage scientists, university students, climate change activists as well as the general public seeking to roll back denial and act.

About the Authors

Dr Haydn Washington is an environmental scientist of 35 years experience. Originally a plant ecologist, he worked in CSIRO on heavy metal pollution for 7 years. This is his fourth book on environmental issues, and he has been researching climate change since his 1991 book *Ecosolutions*.

John Cook studied physics at the University of Queensland, Australia. He runs www.skepticalscience.com, which aims to communicate the peer-reviewed science of climate change to a broader audience.
