Taxonomy of Logical Fallacies

Taxonomy of Logical Fallacies used in the Cartoons

Definitions of Logical Fallacies used in the Quiz

Fake Experts: Presenting an unqualified person or institution as a source of credible information.

Fake Debate: Presenting science and pseudoscience in an adversarial format to give the false impression of an ongoing scientific debate.

Ambiguity: Using ambiguous language in order to lead to a misleading conclusion.

False Choice: Presenting two options as the only possibilities, when other possibilities exist.

Single Cause: Assuming a single cause or reason when there might be multiple causes or reasons.

Impossible Expectations:

Demanding unrealistic standards of certainty before acting on the science.

Moving the Goalposts: Demanding higher levels of evidence after receiving requested levels of evidence.

Cherry Picking: Carefully selecting data that appear to confirm one position while ignoring other data that contradicts that position.

Slothful Induction: Ignoring relevant evidence when coming to a conclusion. Similar to cherry picking but with an emphasis on neglecting inconvenient information rather than highlighting convenient information.

Birds fly... so
gravity is a hoax!

**Gravity is
just a theory!**

A cartoon illustration set against a solid orange background. On the right, a doctor with a large nose, wearing a light green surgical cap and a matching long-sleeved shirt, holds a large hand saw. He has a smug expression. On the left, a patient with a mustache and wide eyes looks up at the doctor. A large white speech bubble from the doctor contains the text 'Relax! I have a bachelor in computer science!'. A smaller speech bubble with a red exclamation mark is above the patient's head. The doctor's shirt pocket contains two pens, one blue and one red. The patient is lying under a light blue blanket.

Relax! I have
a bachelor
in computer
science!

Tonight, we'll talk to
a scientist about the
solar system...

...to balance her views,
we've invited a member
of the Flat Earth Society.

**What problem?
I feel fine!**

DO OR DO
NOT. THERE IS
NO TRY!

I've actually
been moving
upwards since
we started
"sinking."

**You'll hit the ground
in 12 to 15 seconds.**

**Get back to me when
you have more certainty!**

I can't be drunk. My
blood alcohol is only
0.08 percent!

A cartoon illustration of a middle-aged man with a large mustache, wearing a light blue polo shirt and a dark blue tie. He has a concerned or questioning expression on his face. A white speech bubble originates from him, containing text.

Iron deficiency?
but iron is only
4.4 parts per million
of your body's
weight.

Ibuprofen
won't work.
It's only three
parts per million
of your weight.

Aha! Proof that
chickens don't
lay eggs!
